JUNE 1987

McCulloch and Eager Beaver™ chain saws are identified by a model number (in this instance, 600041, 600046, etc.) followed by a suffix number (01, 02, etc.) stamped on the identification plate attached to the saw. Suffix numbers denote variations in parts or assemblies in the manufacture of the saw.

Part numbers listed in this I.P.L. which have a circled number ② or numbers preceding the description, are used only on the model or models identified by a circled number ② or numbers.

Part numbers which have one or more dots (.) preceding their descriptions may be ordered individually, but they are also included in the kit or assembly whose description begins directly above the dot(s).

The policy of McCulloch Corporation is one of continual improvement in design, manufacturing and engineering advancement wherever possible to assure still finer two-cycle power tools. Hence, specifications, equipment, colors, design and manufacturer's suggested list prices are subject to change without notice and McCulloch Corporation reserves the right to make such changes without prior notification or obligation to backfit or supply backfit components for units previously shipped from the factory.

① Used on all PM 605, all Super PM 610 and all Eager Beaver® 3:7 models.

② Used on PM 610 and PM 650 11 level and 12 level models. Identify components before ordering any parts. See callout number 4.

③ This is an alternate kit that will backfit older 600 series chain saws originally equipped with metal pawls. This kit also includes those parts listed as Item Number 40, 41, 42 and 43.

④ Used on PM 610 and PM 650 11 level and 12 level models. Identify components before ordering any parts. See callout number 2.

⑤ Used on PM 605 models ONLY.

⑥ Does not include Pin, part number 87710, shown as Item Number 61.

⑦ Does not include two (2) bearings, part number 111021, listed as Item Number 60.

⑧ Before ordering Piston Ring set for PM 610 units, see Service Notes on page 10 for piston ring size.

⑨ Used on PM 650 units only. The replacement cylinder does not have a hole for the DSP valve. Parts are for service replacement only.
